Editing or adding specialties for a provider enrolled in Medicaid is completed by initiating and finalizing an update to the provider's Medicaid record. Locate the provider's record on your dashboard in PNM and click on the Reg ID.

This process can be completed by the Administrator for the provider's Medicaid ID or a user with the Agent role, if that Agent has been assigned the 'Enrollment Agent' action by the Administrator.

2

Under the Manage Application section, click the '+' icon to expand the Enrollment Action Selections.

Click on the hyperlink which says "Begin ODM Enrollment Profile Update."

**If you have previously initiated an update, but have not submitted the update, this link will appear as "Continue ODM Enrollment Profile Update."*

A section will appear below the table where you can add the specialty. Select a specialty from the drop-down menu. Do not alter the infinite end date that PNM lists for that field. (Ex: When adding the LPCC, leave the 12/31/2299 date.) Once the specialty is added, click **Save**.

A red dot indicates that changed information has been saved on the page.

A red X only appears for specialties added during this update. Any previously added specialties cannot be deleted.
